

Rwanda fiber optic cable broken

Overview

All cables were repaired as of 3 June 2024 —approximately three weeks after the initial damage. This report highlights the impact of these submarine cable cuts on local connectivity and the importance of developing resilience to maintain an acceptable level of service in the face. Millions of Canalbox customers across Africa are experiencing sluggish internet connectivity following major cuts of the company's submarine cables in West Africa, the company has publicly acknowledged.

“Submarine cables in West Africa have been cut, affecting many internet service providers. These guidelines on fiber optic cables underground installation aim at avoiding any damage to existing underground infrastructure such as existing FOC, sewage or water pipes, electrical cables or other telecommunications cables. They also intend to insure that the installation of FOC is done in. Undersea cable companies that extend internet services to West and Central Africa estimate that it could take five weeks to repair damages to their facilities noticed last week. Widespread internet outages in Nigeria, Ghana, Senegal and Côte d'Ivoire were reported on Mar. Rich Applications: Data, Voice & Video (Education, Health, Agriculture, Safety & Security, Commerce, Transport, Energy, etc. The cause of the damage is a suspected dragging ship anchor, a common source of submarine.
