

SMA fiber optic sensor

Overview

SMA connectors are crucial in medical devices for connecting fiber optic sensors, allowing accurate monitoring of temperature, pressure, and light levels. Many sensors may need an additional mounting bracket to connect to this fiber adapters. Have questions?

Require assistance?

Click below to contact Ophir Photonics and we'll get back with you. The 884-SMA Fiber Adapter accommodates optical fibers terminated with SMA connectors. The adapter is directly screwed on the detector head or on the 884 Series attenuator. The fiber connector is machined at an angle so that the light coming out from the fiber tip is perpendicular to the detector. The first connector to be accepted as a widely used standard in the early days of the fiber optic industry, in the late 1970s, was designed by Amphenol in CT as a variation of their coaxial electrical connect known as subminiature assembly, or SMA. By checking this box I confirm that I have read the Privacy Policy. The ferrules themselves are available in various materials such as ARCAP and copper, which ensures good heat dissipation even.
