

Sc terminal box with 8 ports and multi-mode full configuration

Overview

The Haile P1-8MD-ST fiber optic terminal box features eight ST ports accommodating 8-core multi-mode fiber connections. Its snap-on design allows for quick and easy access, making fiber pigtail splicing and cable management straightforward. NEXCONEC ® WP08U1 IP65 distribution box offers the ability to terminate 8 fibers housed in a strong robust ABS enclosure for indoor and outdoor applications. With the ability to use both SC Simplex and LC Duplex adapter types offering a flexible solution to the end user, enabling them to. The 8 ports metal fiber terminal box is similar to the fiber optic patch panel in appearance and function, which designed to connect optical fiber cable and pigtail within building entrance locations and other indoor wall mounted environments. It is mainly used for terminal of FTTH system. The functions are splicing, splitting and output etc., and can prolong terminating, protection and management for the optical cable, which is the necessary device of optical network transfer.
