

Secondary distribution box 650A

Overview

This Maierke power distribution block is exactly what you need for clean, organized wiring in your vehicle or marine application. The 650A capacity means it can handle some serious current without breaking a sweat, with maximum operating voltage of 300V AC or 48V DC. It is part of a range of low voltage electric insulating switchboards and industrial boxes. Thanks to protection ratings and high quality build (from 65 x 65 mm up to 361 x 254 mm) plus 3 different cover heights are available. ABB offers a total EV charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. ABB's Low Voltage Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers.
