

# Simple JP Integrated Distribution Box

## Overview

The JP-series outdoor integrated distribution box is a comprehensive outdoor power distribution device that integrates multiple functions, including metering, outgoing circuits, and reactive power compensation. JP series outdoor integrated power distribution boxes are comprehensive power distribution devices with the functions of. Good fireproof performance Reliable insulation performance No pollution Strong recyclability Stable operation and low failure rate Simple daily maintenance Strong adaptability to the environment Flexible and convenient installation Low loss High heat dissipation efficiency Low noise Perfect. JP series outdoor integrated distribution box, is a metering, wire, reactive power compensation and other functions in one integrated outdoor distribution device, with short circuit, overload, overvoltage, leakage protection and other functions, small size, Beautiful appearance, economical and. JP series outdoor integrated power distribution box is an outdoor integrated power distribution device integrating metering, outgoing line, reactive power compensation and other functions. It is widely used in urban and rural power grids, industrial power systems, and public infrastructure, featuring compact structure, easy installation.
