

Single-tube communication tower

Overview

Single tube tower, also called monopole tower, is a commonly used type. It belongs to the field of pipe tower technology, including tower body and working platform on top of the tower. At the bottom and on the working platform of the tower, there is a door opening respectively, antenna support is. The Single-Tube Communication Tower with Fast Installation Cost-Effective Steel Material for Emergency Communications represents a breakthrough in modern tower engineering, combining innovative design principles with premium materials to deliver unparalleled performance in critical communication.

① Main structure: A single tube tower is a self-supporting high-rise steel structure with a single large-diameter conical steel pipe as the main structure.

② Connection method: The tower sections are connected as a whole. Hebei Tengyang Steel Structure Co. is specialized in the production, design, installation and maintenance of GFL GJT GH series lightning rod tower, GFW lighting wire tower, radio and television tower, beautification tower, bionic tree communications tower, rapid deployment station, decorative.

A1: Our main export products include power transmission towers, communication towers, and power substation structures.

Specifically: Power transmission towers (angle steel towers, steel pipe towers, etc.
