

Spacing of Vertical Supports for Channel Cable Trays

Overview

Vertical Runs: For vertical cable runs within trays, cables should be secured at the top and every 1. All bends must be securely fastened. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. OBO BETTERMANN has offered prod-ucts and solutions for electrical instal-lation for over 100 years. With our many years of experience, we are one of the leading manufacturers in this field. It also demonstrates how Eaton's solutions and services can help: As an industry leader in cable tray, Eaton offers one of the widest ranges of. The spacing between trays, whether horizontal or vertical, depends on various factors like cable type, environment, and tray material.
