

Special Optical Cable for Power Applications Chromatography

Overview

Latest generation of high power silica fiber cables produced for various lasers in broad spectral range. These cables deliver much higher power than conventional cables due to their special Laser fiber in combination with high quality connectors design. In Stock These items are in stock. Bio-Rad offers individual. The fiber optic cable is also known as the fiber optic cable, the name in English is Fiber Optic Cable and it does not contain one or more fibers that carry light as "Optical Fiber". We provide new solutions specifically for industrial, Oil & Gas, underwater and flooded areas and harsh environments. Prysmian can also offer a complete sensing. Automation technology deals with the measurement, control and regulation of automatically operated machines and production plants and is used in industries such as mechanical engineering, the automotive sector or in the electrical and energy industries. Reliable and cost-efficient connections. SEL cables and accessories enable high-speed, reliable communications between devices and networks in a wide range of applications, from substation automation to industrial networking.
