

Steel cable trays for data centers

Overview

From galvanized steel cable trays to heavy-duty stainless steel options, they offer solutions tailored to the specific needs of power distribution and data center applications. Modern data centers demand infrastructure systems that support extreme cable density, high power loads, rapid expansion, and zero tolerance for downtime. From cable management to airflow containment and structural mounting components, every element must be engineered for performance, durability. Legrand is launching a new surface treatment for its Cablofil steel wire cable tray system which is ideally suited to both the white and grey space of the modern data center. Let's talk about Data Centre Cable Trays and the plans needed for high-density cabling. Crowded spaces and changing technologies in data centers, data closet, tenant areas, data backbones make Basorfil the ideal cable management solution.
