

Stripping the OPGW optical cable

Overview

To strip the optical fiber coating layer, you must master the three-character fiber stripping method of flat, stable and fast. "Flat" means holding the fiber flat. The exposed. In the telecommunications world, improperly terminated Optical Ground Wire (OPGW) 1 cables can lead to severe network issues. The solution?

Mastering the art of OPGW cable termination 2 ensures seamless communication. OPGW cable fusion splicing is a meticulous job, especially in the end face preparation, fusion splicing, fiber coiling and other links, which require the operator to observe carefully, consider carefully and operate in accordance with the specifications. - SCOPE This document covers all the activities usually performed by PRYSMIAN for on-site installation of OPGW fibre optic cables, including transport, installation, accessory assembly, verification of optical. Used by electric utilities on transmission lines with the voltage of 35 kV and higher for creating optical communication lines and protecting the power lines from lightning strikes.
