

Sudanese Light Transmitter SFP

Overview

The JS-SM3125E-10I SFP28 transceiver provides 10/25GBASE-LR throughput up to 10km over single mode fiber (SMF) using a wavelength of 1310nm via an LC duplex connector. This module provides 10G backward compatibility and simplifies network upgrade. Compatible with EX-SFP-10GE-ZR100. Purchase from nearby warehouses. Small Form-factor Pluggable (SFP) is a compact, hot-pluggable network interface module format used for both telecommunication and data communications applications. Built-in digital diagnostic monitoring (DDM) functionality is available for designated SFP types, allowing users to monitor the unit's transmitter optical output power, receiver input optical power, internal temperature, supply voltage and transmitter bias current single-mode.
