

Swiss cable reel is resistant to low temperatures

Overview

They are oil-resistant, extremely abrasion-resistant and approved for temperatures from -40 to 80 °C. Specification of suitable cable types for temporary use on construction sites | Cable reels and cord extension sets on construction sites are subject to exceptional mechanical and thermal stresses, and also to the influence of weather conditions. Two particularly practical features are the locking button recessed into the hand grip and the integrated plug holder. e reels are the optimal solution. PUR, a thermoplastic polyurethane elastomer, has. Based on the resources of one of high end's most distinguished design companies, the swisscables product range offers truly innovative technical design and sonic merits at a groundbreaking price-performance level, manufactured to the highest standards in Switzerland. It is UV stable and moisture resistant. We also guarantee that the entire line reel is knot-free. Which cable pull cord is available?

We offer a wide range of blowing cords, which can vary depending on.
