

The broadband light on the fiber optic router is not on

Overview

If no lights are illuminated on your fiber router it's likely not powered on: Confirm that the power cord is securely connected from the Power port on the back of the router into a working electrical outlet. On the back of the router, check the On/Off button to confirm that it's. Before I tell you a simple trick to switch on the internet light and restore your internet connection, let us know about the different LED lights on the modem-cum-router. If the. Learn what each light on your fiber equipment means—from power and fiber signal to Ethernet and phone service—and how to quickly troubleshoot issues. This light shows whether your ONT is getting power. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. If the lights on your ONT aren't showing the expected pattern (Power on, LOS off, PON on, LAN flashing), here's a quick troubleshooting checklist you can try before calling your ISP: Confirm the ONT's power cable is firmly connected at both ends and that the plug socket is switched on.
