

The broadcast FTTH optical receiver is displaying a red light

Overview

If it is normal, use a red light pen to test whether the cable is connected. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. It's the ONT if it's the LOS (loss of signal) light that is lit Hub is orange light TBH, the LOS light being lit means the router lights are irrelevant, they must be in a fault status because the underlying network is in a fault condition. as you are posting on BT Consumer forum, presumably BT. (1) The light is flashing, indicating that the light cat is connected to the computer or user router normally, go to step 6. Coupling is done all the time in data centers but does have a higher likelihood of failing than a splice does. The Thor Fiber Optical Mini CATV RF 45-900Mhz Transmitter is mainly used for transmitting long distance optical fiber transmission of CATV RF - Analog or digital QAM or ATSC Television Digital TV, telephone and data transmission.
