

The current displayed on the cabinet exceeds the upper limit

Overview

Solution 1: Check the process settings (voltage and current upper and lower limits) to ensure they are reasonable. (Please contact the after-sales department for assistance. As 800V platforms. I have used 'IMW65R072M1H' Infineon switch in this topology, however I'm getting the error as 'The device current (86. Please. I am using a MAX V 5M2210ZF256 CPLD to drive a bunch of LEDs and when I try to compile my program I get the following error: "Error (169007): Current density too high in I/O bank 2 -- pins combined exceed the limit (130. 0 mA" I do understand that the current capability of the bank (bank. Expert insights on photovoltaic power generation, solar energy systems, lithium battery storage, photovoltaic containers, BESS systems, commercial storage, industrial storage, PV inverters, storage batteries, and energy storage cabinets for European markets Explore our comprehensive photovoltaic. CRITICAL WARNING: [Power 33-333] The Vccint supply current exceeds the maximum limit of the selected package.
