

The distribution box has a reserved FA interface

Overview

go to System -> HA edit the 'Master' device and enable 'Management Interface Reservation' once this is enabled select an an interface, and configure the appropriate gateway. The 'R' box complements the existing Rockwell Automation safety distribution boxes by adding circuitry to accommodate SensaGuard™ interlock switches and guardlocking interlock switches. For the purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and. To operate properly, Fabric Attach (FA) must be configured properly at both the global and interface level on the switch. Use this procedure to verify FA configuration. show fa interface port [{slot/port [/sub-port] [-slot/port [/sub-port]] [. Safety. I have active/standby FGs and the gateway of my mgmt VLAN via port1 of the FGs. Why it works only when I put these interfaces in the VRF=0 (global VRF) and not working when I put them in another VRF ?

It doesn't work neither I set the same VRF ID nor a different.
