

The two routers are connected via fiber optic cable

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Are all the strands in the optic fiber cable gonna work at the same time and are they compatible with the transceivers?

Thank you yes, for single-mode modules, you'll need single mode fiber/cable. Check the specs, that the advertised wavelengths and desired distance/length match. Assuming you don't. Yes, you can use fiber optic cable to connect to their router (but you would want to connect to in on an ethernet port, rather than to the WIFI. Before you begin configuration, it is. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX.
