

Ttl1x9 optical module

Overview

Good quality 2Mbps Ultra-Low Data Rate 1x9 TTL Long Reach Transceiver (SMF, 1550nm, 100km, Duplex SC/FC/ST, 3). At present, the maximum transmission distance supports only ~20km in low-speed data (0~2MHz) optical transmission for 485/232 data or CPU serial. The UF-1x9-2M-20-Cxx-3V family CWDM optical transceivers from UTP provide the system designer and manufacturers with products to implement a range of industrial control, special low data rate Ethernet designs at the 0Mb/s-2Mb/s rate. This series fiber optic transceivers are all supplied in the. Yet, amidst the rise of compact Small Form-Factor Pluggables (SFP, SFP+, QSFP+) and cutting-edge Coherent modules, the humble 1x9 optical transceiver remains a critical, reliable workhorse in numerous applications. Eoptolink 1x9 optical transceiver is designed for use in 0~2. It is usually directly cured on the circuit board of the communication equipment and used as a fixed optical module. The modules operate at special extended voltage and temperature (-10 to 85 C) ranges.
