

Tying bridge frame poles

Overview

The Square Lashing Knot is used to lash two poles together, usually at right angles. It's perfect for building a framework for shelters, bridges, furniture, beds, or even ladders. Start with a single Timber Hitch around both poles. Shear Lashing Method Do you need to bind two poles at their tops?

A shear lashing is your best. We can offer a variety of end connections for your Steel Arch Bridge Tie Bar Hangers ranging from cast forks, forged eyes, threaded ends or round steel tie rods with upset forged threaded ends for horizontal weld connection. In every case we can advise you how to create the best connection in such. Masonry arch bridges, which have a very long history, and more recent landmark bridges, such as Sydney Harbour Bridge in Australia and the Tyne Bridge in England, are all 'thrust arches' and rely on horizontal restraint from the foundations. In many cases, such 'external' restraint is not feasible.
