

U-shaped support for cable trays

Overview

The unique U shape is designed in a way that it cradles the tray while allowing easy accommodation of cables. This type of bracket is mainly used for holding cable trays or ladders in position without letting them sag or bend out of shape. Cables and lines can be fed in and out at any time and anywhere thanks to the mesh structure. Cable supports are manufactured according to common standards from high quality raw materials. UNITECH's metal framing channel is cold formed on modern rolling machines from low carbon. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience for each of these installation challenges and safety. es in the industrial environment. Constructed from durable steel and finished with a corrosion-resistant electro zinc plating, this bracket ensures long-lasting support in both commercial and. The MSC support is a flexible, light-weight and cost-saving support system suitable for all major disciplines, including electrical, instrumentation, telecommunications, HVAC and plumbing.
