

Uruguay Flame-Retardant Fiber Optic Cables for Smart Buildings

OEM/ODM
CUSTOMIZATION AVAILABLE

Overview

Available in both multimode (OM3/OM4) and singlemode (OS2) variants, they support configurations from 4 to 24 cores in a durable central loose tube design. Meeting stringent international standards, these cables are tested for both fire resistance (IEC 60331-25) and flame. ETK Kablo 's fire-resistant fiber optic cables ensure continuous data transmission during fire conditions, safeguarding critical communication lines when reliability is most crucial. Certified to B2ca CPR and FE180 fire-resistance standards, these cables maintain optical integrity under extreme. einforced Plastic (FRP) armouring. This brings flexibility and lower bending radius tha provides a high rodent protection. The design is reiThese indoor fiber optic cables are used exclusively within buildings and must have a flame-retardant cable jacket to fit this purpose. Flame resistant cable may be deployed in-duct (conduit) or cable tray. As a manufacturer, we know that the chemical.
