

What does fiber optic distribution unit mean

Overview

A Fiber Distribution Unit (FDU) is a type of hardware that provides fiber cable management at termination points. Why do operators, designers, and installers use additional fiber optic hardware racks for cable and fiber management?

The active electronics are the most expensive part of the. The Optical Distribution Frame as the central nervous system or the primary distribution hub for your outside plant (OSP) fiber optic cables entering a building or a major facility (like a Central Office, Data Center Meet-Me-Room, or Cell Tower Shelter). They function as junction points that manage, protect, terminate, and distribute fiber optic cables, ensuring efficient data transmission between different. Distribution cable and drop cable is connected in between the optical fiber distribution unit (FDu), which is an important part of the whole optical distribution network (ODN). Both indoor and outdoor. FODU stands for Fiber Optic Distribution Unit.
