

What kind of fiber optic cable is needed for a red light pen

Overview

5mm Universal Connector for both single-mode and multi-mode ST, SC, and FC Interface Fiber Optic cables. The unit is constructed with an aluminium body and a stainless steel head with integrated dust cover. 650nm Pen-type Visual Fault Finder for fiber tracing, fiber routing and continuity checking. It features a red design, a universal connector and an accurate measurement. It locates fibers, finds. In the environment of integrated network wiring, in order to meet the needs of high-performance wiring, optical fibers often appear bare fiber, disc fiber, optical fiber splicing, etc., because optical fibers are fragile compared to copper wires, and are prone to failure, so optical fiber detection. The RPEN-210 is a necessity tool that should not be missing from any fiber plant manager or fiber optic installing technician. Always insert and remove the fiber connector without bending the connector to avoid breaking. The Optical Fiber Visual Fault Locator (Red Light Pen) utilizes a 650nm semiconductor laser, offering a reliable and stable red light output for fiber fault detection in both single-mode and multimode fibers.
