

What manufacturers produce high-speed optical modules

Overview

Major optical modules manufacturers and suppliers: Innolight, Eoptolink, Huagong Tech, Linktel, Accelink, CIG ShangHai CO. Optical transceivers are critical components in modern communication infrastructure, enabling the high-speed transmission of data across optical fiber networks. These devices convert electrical signals into optical signals and vice versa, supporting seamless connectivity in data centers. From 5G networks and AI-powered data centers to cloud computing and fiber-to-the-home (FTTH) applications, optical transceivers play a critical role in enabling seamless and high-bandwidth communication. Fueled by the explosive growth of AI clusters (NVIDIA GPUs), machine learning fabrics, and 5G/6G network deployments, the demand for high-speed 400G and 800G optical modules has pushed global supply chains to their absolute. Coherent Corp. We aim for this list to be as impartial and objective as possible, but limited.
