

What optical module should be paired with the Huijue RRU2468

Overview

The BIDI modules must be used in pairs. For example, if you install the GE-SFP-SX-SM1310-BIDI in the local port, you must install the GE-SFP-SX-SM1550-BIDI in the peer port. This section elaborates on how to install optical transceivers and AOC modules respectively. Grasp. Without the prior written consent of Ruijie Networks, no organization or individual is permitted to reproduce, extract, back up, modify, or distribute the content of this document in any manner or form. It is also prohibited to translate the document into other languages or use any or all parts of. When it comes to the connection between two fiber optic transceivers, the following four factors should be taken into considerations: wavelength, speed, fiber type, and the connection to switches. Grasp. When the optical module works on the switch, it is usually necessary to read the internal information of the module to understand its working status, such as the module connection and real-time collection of light, temperature, etc.
