

What types of ceramic fiber optic adapters are there

Overview

Simplex, duplex, and hybrid adapters for LC, SC, FC, and ST — precision ceramic and bronze sleeve options. A fiber optic adapter — also known as a coupling or mating sleeve — is the passive device that aligns two connectors inside a patch panel, wall plate, or distribution box. The table below summarizes the most common fiber optic adapter types based on connector type, fiber mode, and port count, along with their typical applications: Connects identical connector interfaces (e. Standard patch panels, data center links, structured cabling. The types of fiber optic adapters include: Connectors are identical at each end • LC-LC • SC-SC • ST-ST • FC-FC • MPO-MPO Connectors are different at each end: • LC-SC • LC-ST • LC-FC • SC-ST • SC-FC • FC-ST Additionally, depending on the specific fiber transmission modes and the type of fiber. A fiber optic adapter, also known as a fiber coupler, is a passive device used to connect and align two optical fiber connectors.
