

Xlr type distribution box

Overview

□ TL;DR — The core answer you need right now: An XLR splitter box (also called a microphone splitter or balanced audio distribution box) is a purpose-built device that safely splits one balanced XLR input into two or more isolated outputs—without degrading signal integrity . □ TL;DR — The core answer you need right now: An XLR splitter box (also called a microphone splitter or balanced audio distribution box) is a purpose-built device that safely splits one balanced XLR input into two or more isolated outputs—without degrading signal integrity . Upgrade your audio connectivity with XLR splitter boxes. Divide a single input into multiple outputs for a versatile and efficient signal management solution. Like its “Hot Box” predecessor, the Hot Box v2 features 6A self-resetting breakers on each of its XLR4F output connectors and a master. The global market for XLR distribution boxes is experiencing steady growth, driven by increasing demand in industrial, commercial, and entertainment sectors. Current market size is estimated at \$XX billion, with projections indicating a CAGR of X% over the next five years. This compact unit accepts DC input from the separate PS-90 power supply via its single male 4-pin XLR input.
