

Xxm30 type distribution box specifications

Overview

This product is suitable for AC 50Hz systems with voltages up to AC single-phase 220V or three-phase 380V, and currents up to 250A. It provides functions such as line overload protection, short-circuit protection, and circuit switching for indoor lighting and power distribution. The XXM series lighting and power control distribution boxes are available in three variants: universal type, outdoor type, and transparent window type. They can be designed for either surface-mounted wall installation or concealed recessed installation based on user requirements. Designed with a robust steel enclosure, it safely houses circuit breakers, fuses, and control devices to manage lighting, motor loads, and. The XM30 distribution box and lighting box are suitable for lighting, power control, leakage protection, overload protection, metering distribution, and equipment power socket control in factories, office buildings, shopping malls, hotels, high-rise buildings, and other locations.
